

Hernandez-Bernard - Risk Assessment Foundation Training - Final test successful

no-reply-survey@imperial.ac.uk <no-reply-survey@imperial.ac.uk>

Wed 10/05/2023 14:54

To: Hernandez Perez, Bernard A <b.hernandez-perez@imperial.ac.uk>

You have successfully completed this test with a score of: 97 %

The pass score is: 80%

VERY IMPORTANT INFORMATION

This email is your certificate of successful attendance for this course.

It is important that you save it in your training record folder or Continuous Professional Development portfolio (CPD), as it will not be possible to obtain a duplicate.

In future, you may need to provide a record of your training history, either for audit purposes, or in the process of applying for a new role.

This certificate is acceptable evidence.

Response Summary:

personal details: *

Last name: Hernandez

First name: Bernard

CID: 00824551

Email address: b.hernandez-perez@imperial.ac.uk

Department: Infectious Diseases

Are you staff or student?

Staff

Please enter your PI / Supervisor / Safety Officer / Manager email address: (They will be emailed your test result). It is important that you provide the correct email address. You can check who your Departmental Safety Officer is with this College DSO list

b.hernandez-perez@imperial.ac.uk

Where do you work?

Infectious Disease

Select 4 reasons why risk assessment should be carried out

There is a moral obligation because the risk of someone dying or otherwise being harmed by their work is reduced

There are financial reasons, as efficiency can be increased and risk to business reduced

Effective control and emergency procedures are more likely to be in place as a result of them
If things go wrong, there is evidence that a risk assessment has been conducted and that law was complied with

What is the definition of a competent person?

A person who has relevant experience, knowledge and training and knows their limits

What does 'use' mean with relation to plant, articles and substances in the work place? Select th...

"Use" includes transport, storage, installation, commissioning

"Use" begins with receipt and ends with disposal

"Use" includes any activity relating to task including, maintenance, decommissioning, and disposal of items, plant and substances

Who at Imperial College is responsible for ensuring that contractors are aware of any hazards the...

Any member of the College who employs a contractor

What are the four main routes of exposure for hazardous substances to get into the bloodstream an...

By ingestion

By penetrating the skin or eyes via a wound

By being absorbed into the skin or eyes

By inhalation

What are emergency procedures?

Emergency procedures are local procedures that must be in place if controls fail and something goes wrong - for example for controlling spills and personal contamination and injury, as well as for fire and evacuation of the area

What is the first control in the hierarchy of control measures?

Eliminate the hazard completely

What is the definition used in RAFT of significant risk?

A risk with high scores for both its likelihood of occurrence (sometimes called frequency) and its potential impact (sometimes called severity) to the College, environment, department or individual

Everyone who may be affected if an emergency arises must know exactly what to do as the person in charge may not be around

True

Under what circumstances will a generic risk assessment be acceptable?

When hazards, people who may be harmed, extent and type of harm is similar and where the control measures are the same – and in place – then a generic assessment may be conducted

People do not need to be trained on how to use control measures correctly, or know what can interfere...

False

Which two of the following statements about the effectiveness of control measures are false?

It is the responsibility of the safety officer to monitor the effectiveness of all controls

People need to be trained on how to use control measures correctly, and what can interfere with the effectiveness of such controls

There is a different risk assessment form for every type of hazard and hazardous activity.

False

Select 5 things from the list below that you should do after completing your risk assessment.

If there are any actions required, decide which takes priority

If there are any actions required, contact the relevant people to get things done

Monitor that any actions are implemented

Monitor to check that any controls are effective

Record your findings

Which one of the following statements about College risk assessment forms is untrue?

You should always use the form used in RAFT for conducting risk assessments

From those listed below, what are the 3 circumstances under which you would conduct an immediate review of your risk assessment(s)?

If a control measure failed

After an incident - an accident or a near miss

If there is any change which could affect the risk - for example, the location, process (use, substances, scale, equipment etc), controls, or personnel (eg if a member of staff tells you they are pregnant and this is not already covered in the risk assessment)

Staff and students are not permitted to conduct lone work outside working hours without getting t...

False

Lone working is a risk-increasing factor which must be considered as part of any risk assessment.

True

What four things from the list below, should you do if your staff and students take work and equipment to another department or premises?

Check that information on any significant risks you introduce into someone else's workplace is discussed with them in advance along with information on control measures and any emergency procedures

Ensure that supervision is appropriate for the level of the risks involved and the competency of the visiting staff or student

Ensure that if your staff and students are "exporting" their hazards to conduct work in another premises, that a risk assessment of the work you control has been carried out by a competent person

Ensure that if you send your staff or students to another workplace that arrangements for health and safety are in place

The College has an Offsite Work policy, guidance and specific risk assessments covering meetings and conferences, work in other institutions, and fieldwork.

True
