This course provides two different case studies which are useful to highlight the skills needed to be a good PhD supervisor. For instance, a good PhD supervisor should have a supportive

personality and be able to provide mentorship. The key elements are to ensure that students stay on schedule and maintain constant progress, advise and guide them based on the knowledge and expertise in the subject area, help during the decision-making process, provide feedback of their work (e.g. manuscripts) and provide encouragement and ongoing support. Also, it is important to facilitate opportunities for students to grow by suggesting online or in-person courses, attendance to conferences, participation in workshops or other events. On a more general aspect, it is important to promote group culture, for
